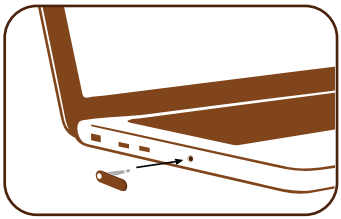
MIC BLOCK



The Problem

» Audio hacking and spying is a very real threat leaving every device with a microphone vulnerable.

Our Solution

» A microphone blocker is a simple device that prevents audio hacking.

How it Works

» Microphone blockers disable the signal from the internal microphone by tricking the device into thinking that an external microphone is already plugged in.

How to Use:

» Insert Mic Block into device's audio jack to disable internal microphne.

» Remove Mic Block to use device's internal microphone.

Prevent Audio Hacking

Perfect for: Laptops, Desktops, Gaming Stations and more!
